

Skills

Programming Languages	Java, Python, C++, Go, JavaScript, TypeScript, Shell
Frameworks & Libraries	Spring Boot, React.js, Django, Kafka, GraphQL, gRPC, PyTorch, LangGraph, Pandas
Cloud & Infrastructure	AWS, Kubernetes, Docker, Jenkins, Terraform, GCP, Linux, Git, CI/CD
Databases & Tools	PostgreSQL, MySQL, MongoDB, Redis, Power BI
Certifications	AWS Certified Solutions Architect Associate (Link), AWS Certified Developer Associate (Link)
Soft Skills & Methodologies	Leadership, Quick Learning, Problem-Solving, Teamwork, Agile/Scrum

Work Experience

Empire State Realty Trust
AI Software Engineer Intern

June 2025 - Present

- Developed a **multi-agent** AI workflow through Salesforce Agentforce, LWC, Flows and Apex classes to analyze and update CRM data through natural language queries, **automating 30% of CRM record updates** across a 30-broker team.
- Created a **TypeScript/Next.js** broker dashboard to visualize live tour activity. Built **Node.js** APIs using WebSocket channels to deliver real-time CRM and tour updates to the broker dashboard.

SUNY Research Foundation, University at Buffalo
Graduate Research Assistant | AI Lab

Jan 2025 - Dec 2025

- Contributed to developing an **conversational AI system** for individuals with motor and speech disabilities under Prof. Rohini Srihari. Implemented a **contextual chunking** system over **RAG** data to improve factual groundedness by 22% over baseline LLMs.
- Second-authored ‘SPICA: A Scalable Personalized Conversational Agent Framework for AAC Users’ published at **ACM IUI 2026** ([Link](#)).

Standard Chartered Bank
Software Engineer II

July 2021 - Aug 2024

- Built an async **Spring Boot** microservice for ThreatMetrix authentication and replaced Hazelcast with **Redis** as the distributed cache, cutting login latency by 2s across a high-traffic **payments platform** serving 1000+ concurrent users.
- Redesigned the fraud event ingestion pipeline using **Kafka and Kafka Streams** and optimized **PostgreSQL** schemas to achieve 25% faster query execution. Configured **Prometheus** and **Grafana** to monitor event latency and error rates.
- Automated deployments** of 6 Kong API Gateways to a **Kubernetes** cluster on AWS EKS using **Helm charts, Ansible, and Azure DevOps** CI/CD pipelines, reducing release time from 2 hours to under 20 minutes per cycle.

Software Engineer I

- Secured external API access by implementing OAuth 2.0 and OIDC via **Kong API Gateway**, integrating real-time third-party payments initiation services to achieve PSD2 Open Banking regulatory compliance.
- Migrated 10+ Spring Boot microservices to **Java 18** and remediated 20+ CVEs, resolving **Maven** dependency conflicts.
- Developed 12+ **JUnit** API test suites that cut regression testing time by 30% and improved release efficiency.

Projects

SafeBite: AI Food Safety App | Built a **multi-agent** food safety app using the **OpenAI Agents SDK**, integrating multimodal product label scanning and **MCP** for standardized access to user dietary profiles.. Built the full-stack app using **Next.js, FastAPI, and SQLite**.

Ultra-Low-Latency Order Matching Engine | Designed and implemented a high-performance **C++** order matching engine that processes limit and market orders with ultra-low latency and provides clean backend service interfaces via **gRPC**.

Education

University at Buffalo, Buffalo, NY, USA Master’s in Computer Science (Research) GPA: 3.75 / 4.0	Aug 2024 - May 2026
National Institute of Technology Karnataka, Surathkal, India Bachelor’s in Electrical Engineering	Aug 2017 - May 2021
